Education

Vidyalankar Institute of Technology

Bachelor of Technology in Information Technology

Aug. 2024 – present

Current CGPA 10

Government Polytechnic Thane

Diploma in Information Technology

Jun. 2021 – May 2024

91.50

Relevant Skills

- Database Management
- Artificial Intelligence
- Software Engineering
- Machine Learning
- Operating Systems
- Web Development

Projects

CivicFix- A Local Issue Reporter | *Blade, Php, Javascript,Laravel*

October 2025

- Built a Laravel-based platform enabling users to report, track, and manage local civic issues with an intuitive, user-friendly dashboard.
- Implemented role-based access, real-time status updates, and automated workflow to streamline communication between users and administrators.
- Optimized backend workflows and database structure to ensure fast issue processing and seamless user experience.

AI-ML Based Hybrid Movie Recommender | *Python, MySql*

November 2025

- Built a hybrid movie recommender using AI/ML techniques by integrating content-based filtering with collaborative filtering for enhanced accuracy.
- Engineered features such as user login, watch history tracking, and real-time similarity computation using cosine similarity and matrix factorization.
- Optimized the ML pipeline to improve prediction quality, reduce latency, and deliver personalized recommendations through an intuitive web interface.

Academic Administration Platform | *Java, PhpMyAdmin, JavaFX*

March 2024

- Built a comprehensive academic administration system using Java and PHPMyAdmin to manage faculty profiles, student records, attendance, marksheets, and internal assessments.
- Designed secure login modules and role-based dashboards for administrators, teachers, and students to access and manage academic information.
- Implemented a chatbot-like communication feature allowing real-time interaction between students and faculty for queries, updates, and academic support.

Training and Certifications

Ignitech Private Limited

June 2023

Hands-on AI ML Training

Thane, Maharashtra

- Hands-on academic training covering supervised/unsupervised learning, model evaluation, and basic ML project development.
- Completed a structured training program focused on ML algorithms, data preprocessing, and building mini-projects using Python.

IIT – 11-Day Certification Program on Microwave Satellite Data Processing

June 2025

Hands-on Remote Sensing and Satellite Data Training

- Learned fundamentals of microwave remote sensing, satellite imaging principles, and SAR-based data interpretation.
- Processed real microwave satellite datasets, performing operations such as radiometric correction, filtering, and geospatial preprocessing.
- Developed mini-projects demonstrating the full pipeline of microwave satellite data processing including feature detection and analysis.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL, React

Developer Tools: VS Code, Eclipse, Google Cloud Platform, Android Studio, Git

Technologies/Frameworks: Linux, GitHub, Laravel, MySQL, Scikit-Learn, Pandas, NumPy, Matplotlib
